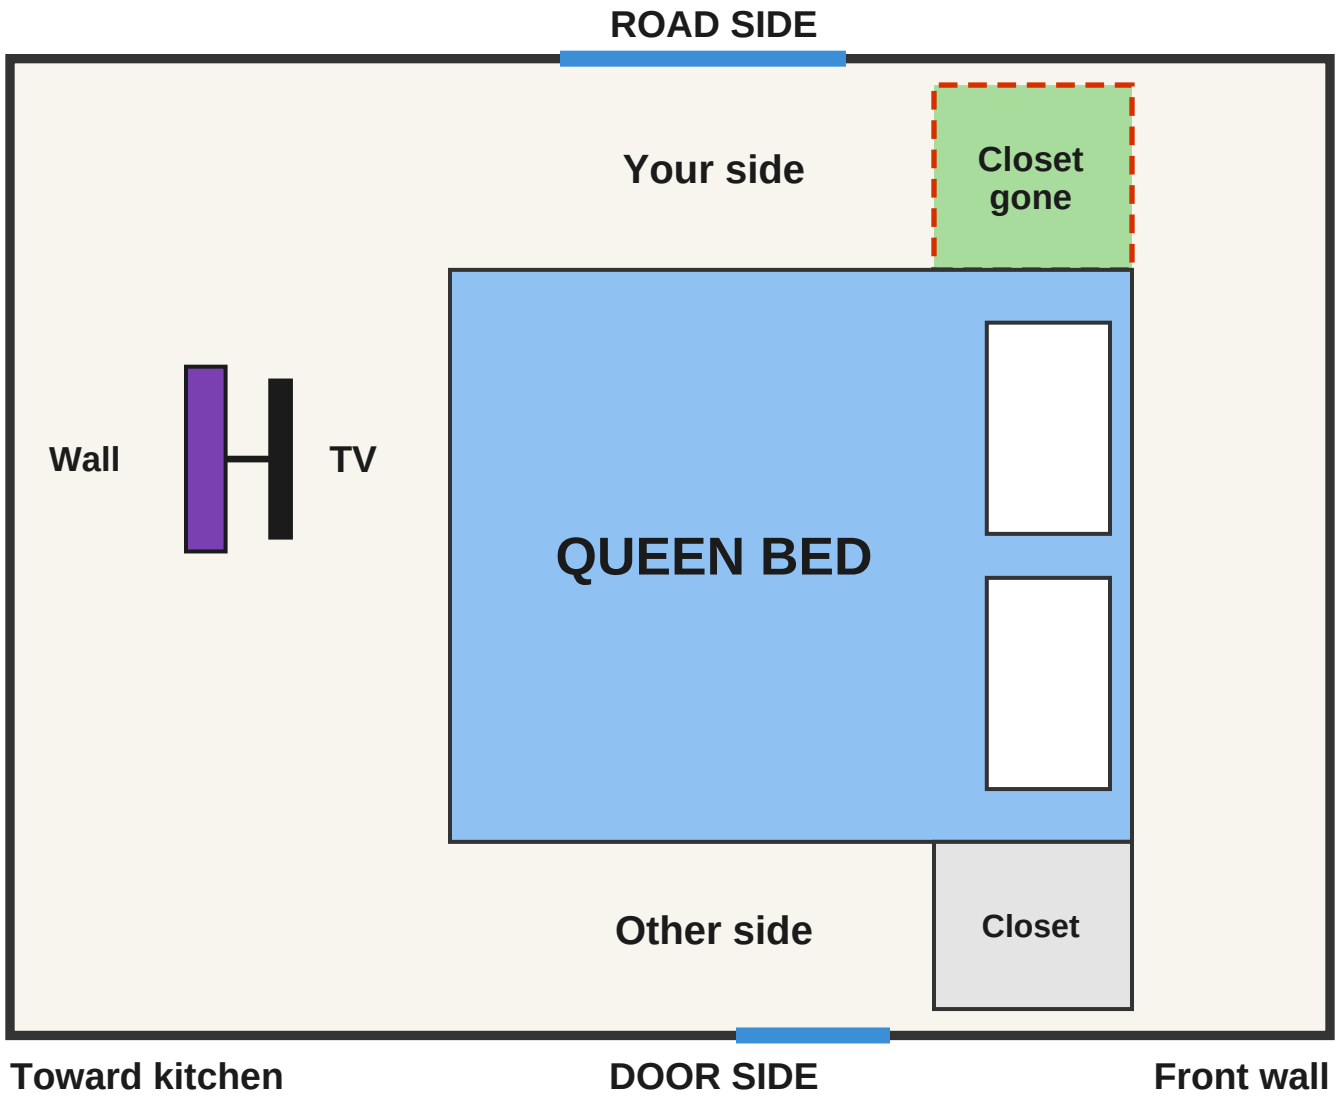
Option 1: Bed stays, your closet comes out

Top-down view of the bedroom. Estimated from the factory drawing, not measured.

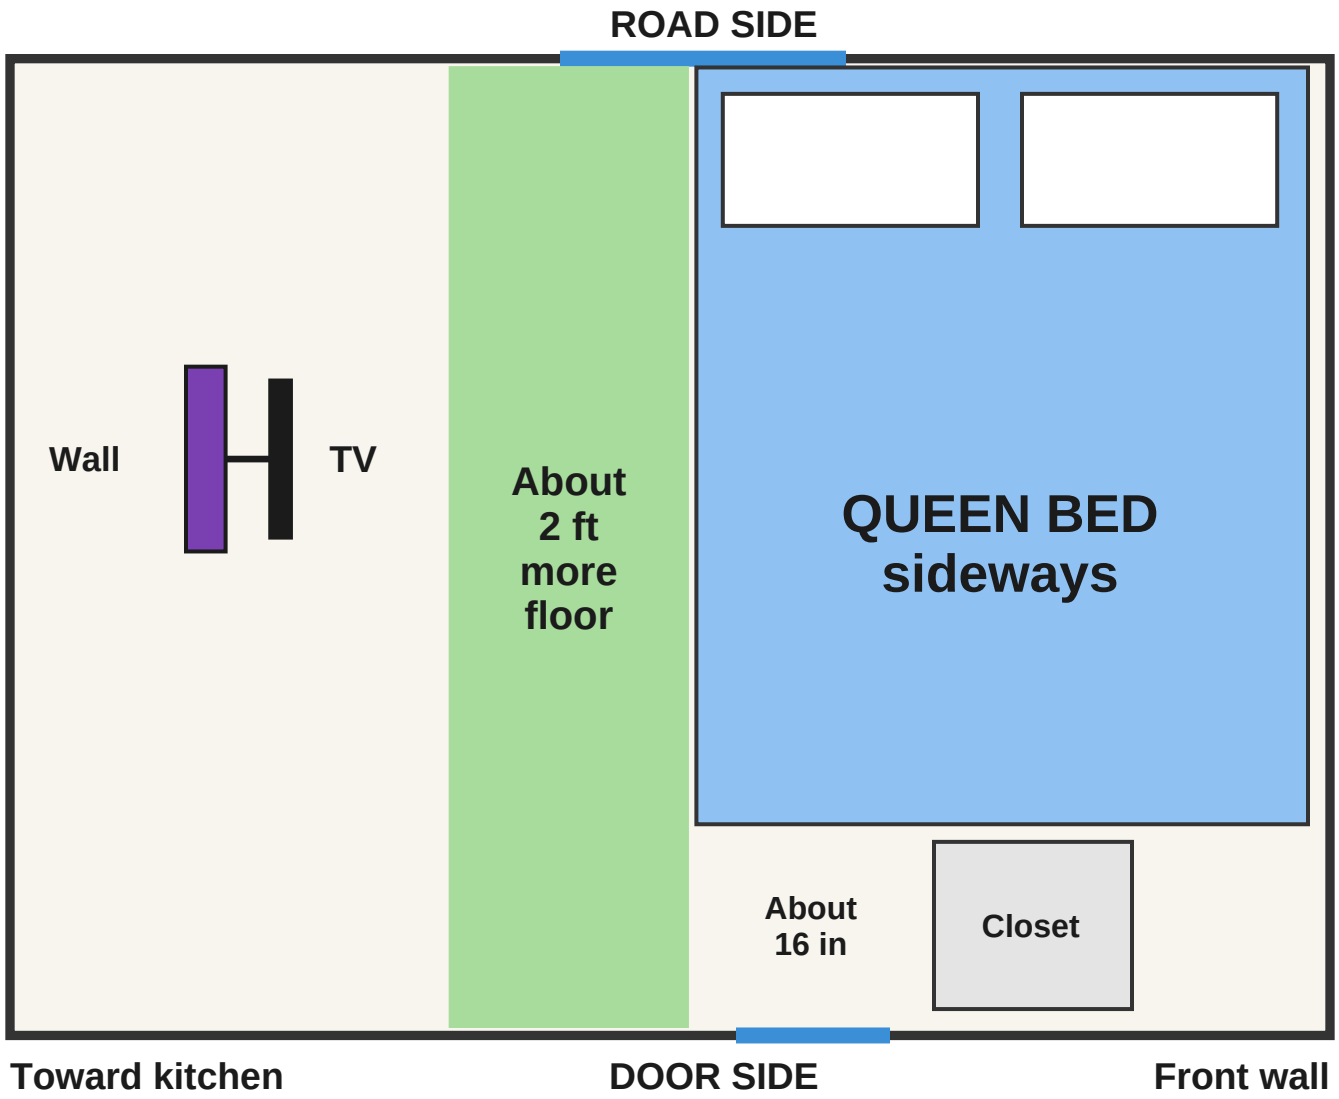


Simple job. No bed rebuild.

You gain about 18 x 19 in of floor on your side.

Option 2: Bed turned sideways

Top-down view of the bedroom. Shown with a 60 x 74 in mattress. Estimated, not measured.



Your closet must come out: the bed goes where it stood. The bed covers part of that window.
An 80 in mattress would hit the door-side closet. A 74 in one barely clears it.
Whoever sleeps at the front wall climbs over.
